EXPERIENCE

Fast Supplements LLC – Full-Stack Web Developer

March 2025 to Present

- **Developed and maintained two complete websites**, this including both a Shopify e-commerce & NextJS (with Strapi Headless-CMS) project from concept to launch, managing the full customization suite, version / environment handling, and third-party integrations among much more.
- **Debugged complex third-party Shopify theme code**, adapting it into custom solutions that met specific business requirements.
- **Implemented comprehensive SEO optimization** including meta descriptions, structured data, and content optimization, resulting in improved search engine visibility and organic traffic growth.
- **Collaborated with team members** to accurately implement website blueprints from Figma and manage digital marketing initiatives including Google Ads, TikTok advertising campaigns, and affiliate program setup.
- **Provided technical support and IT assistance** for business operations including account management, DNS configuration, and third-party platform integrations.

Silicon Avatar Software LLC – Freelance Web Developer

January 2023 to Present

- **Optimized website performance by up to 50%**, reducing load times and improving user experience through efficient coding practices.
- **Developed and maintained responsive websites** using React and NextJS, ensuring cross-browser compatibility and dynamic user interfaces.
- **Implemented SEO best practices**, significantly improving website visibility and search engine rankings up to first result positions.
- **Collaborated with clients** to deliver customized web solutions, providing technical guidance and gathering requirements effectively.

Ocular Instruments – Production Staff

August 2018 to January 2025

- **Led my department**, coordinating with peers to meet company production goals and ship out thousands of products on time.
- **Streamlined the casing process** by devising several efficient and time saving methods of packaging, organization and material preparation.

Disney Parks Technology Services – SDET Intern

June 2023 to September 2023

- **Restored functionality to a dozen broken test-case audit features**, unblocking the GQE Team's workflow and improving testing efficiency.
- **Updated and maintained mobile test automation framework** using JavaScript, TypeScript, and Cucumber BDD framework.
- **Refactored Chrome extension** to transition from Hewlett Packard's ALM tool to QTest management tool, updating all functions to comply with QTest's REST API.

C2S Technologies – Console/PC Tester

January 2017 to May 2018

- **Collaborated with my team** to complete a series of testcases and verify full project functionality in exceptional time.
- **Discovered and documented** dozens of bugs across a variety of different projects, working alongside the development teams through various detailed reports and imagery.
